

Perspectives In Animal Ecology And Reproduction, Volume 2

By Anil K. Verma,V.K. Gupta

Daya Publishing House/Astral International (P) Ltd, 2004.
Hardcover. Book Condition: New. The Volume II of the book Perspectives in Animal Ecology and Reproduction provides the readers with recent information/achievements and future directions on the subject. This volume comprises two sections and includes nineteen original research papers/review articles. Section I includes eleven papers on the ecological aspects of economically important insects, impact of polluting agents on fish resources, seasonal dynamics of some helminth parasites of lizards and turtles, and the eco-ethological studies on rhesus monkey. Section II on animal reproduction includes eight topics on the impact of various toxicants and radiations on the animal reproductive performance, bio-control of housefly, corpus luteum in turtles, and the breeding biology of common babbler bird. The book will be found exceedingly helpful and favourably received by students, teachers, researchers and scientists in colleges, universities and other research institution all over the country and abroad. The book may also prove useful for students preparing for various competitive examinations. Contents: Contents Chapter 1: Bio-Attributes of Predaceous Coccinellids - A Review by Omkar, Ahmad Pervez, Shefali Srivastava and Barish E James Chapter 2: Status of The Asian Giant Honey Bee *Apis dorsata* F and its Conservation in Southern...
