Brand New Book ***** Print on Demand *****.At a recent event I came across someone who had read both my previous books but was still unable to grasp anything about hacking. The language and tasks discussed in my former books are very complex. He asked me to write something basic that everyone can understand. So, I thought to write about Hacking with a Smartphones, a readily available tool to everyone in this 21st Century. Even a rickshaw driver today who earns hundred rupees a day owns a Smartphone. Understandably, none of us want our data to be hacked by a rickshaw driver, but the tricks and methods in this book have been explained so easily that even they can clench it. With the craze of e-shopping and net banking increasing the rate of cyber crime is increasing too. This book will tell you simple countermeasures about smart phones and digital security, they are simple but dangerous.
